

PRODUCT GUIDE

OUR STORY

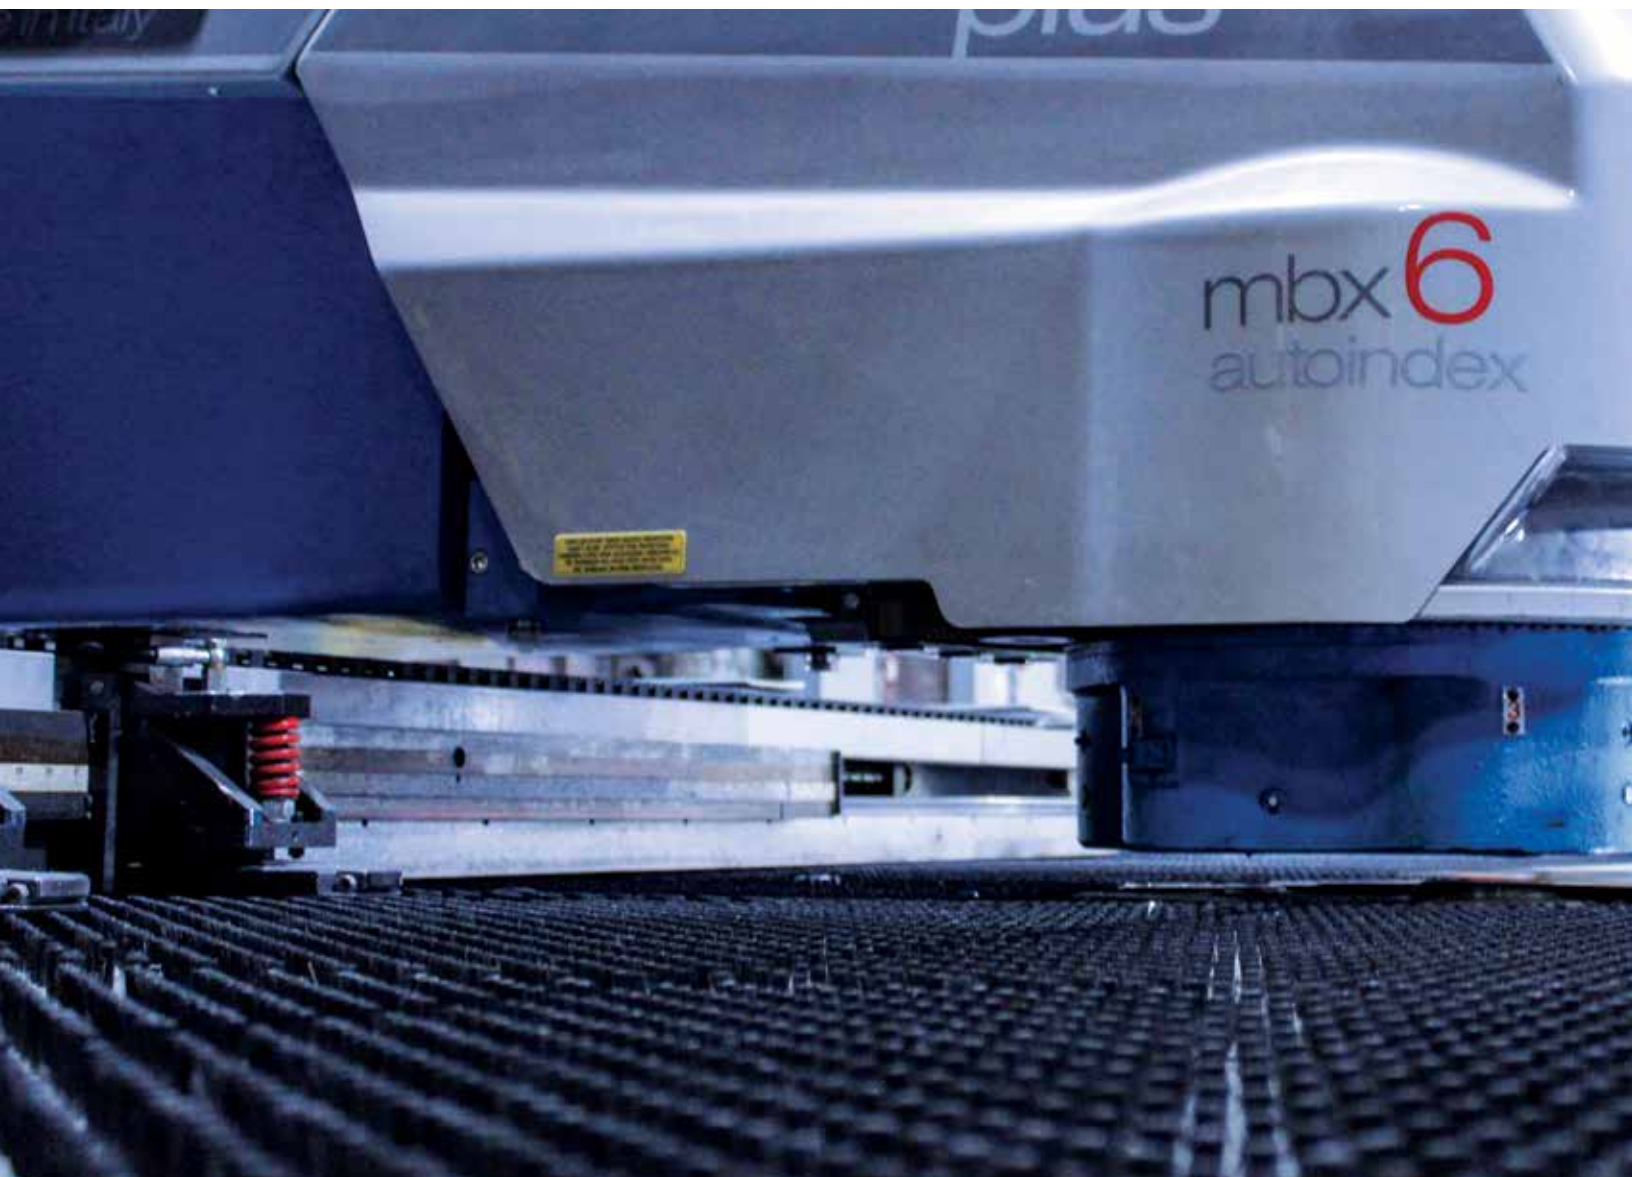

Serrmi Products is known for superior products, exceptional quality and the highest level of professionalism. We guarantee to exceed your expectations and ensure your full satisfaction in the products we offer.

The primary products we offer are instrument houses and cases and that can be customized and built to order. For use in railroad, electrical, utilities, communications, telecommunications, petrochemical, solar and generators.

Walls, roof, and floor panels are constructed of 0.100" Aluminum, Alloy 3003-H14. Doors are constructed of 0.125"

Our houses and cases are welded under the current American Welding Society specifications by certified welders.

Please get in touch to learn more about our team, our company, or for details about the products we provide.

OUR PROCESS

All Serrmi Products are designed to incorporate safety, quality, and functionality. Manufacturing is performed in the United States and is certified to the American Association of Railroad M-1003 Standards. Each house and case are welded under the current American Welding Society specifications by certified welders.

Our houses and case doors are equipped with stainless steel three-point latching systems to insure tight closure. The exterior door handles are made of cast aluminum and will accept standard padlocks. House doors include an interior handle for use when the enclosure is occupied.

Walls, roof and floor panels are constructed of 0.100" Aluminum, Alloy 3003-H14. Doors are constructed of 0.125" Aluminum, Alloy 3003-H14. The structural material used in each house and case is Aluminum Alloy 6061-T6.

House floors are constructed of interlocking panels. After fabrication, the floors are sealed to prevent insect and weather damage.

External hardware is either galvanized steel or stainless steel to resist weather related corrosion. Interior hardware is either stainless or zinc-plated steel.

INSTRUMENT HOUSES

STANDARD SIZE AVAILABLE **6' X 8'**

- + Standard sizing or custom engineered and built to your specifications.
- + Quality materials produced domestically that comply with 'Buy American Act'
